

# BloodTrack® Software

## Version 4.10

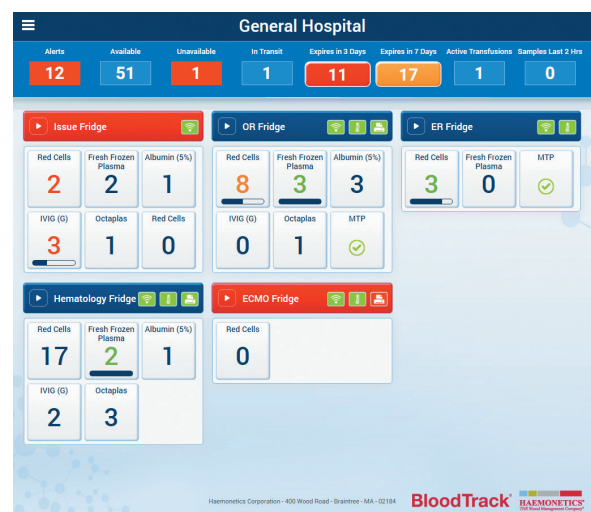

You rely on your BloodTrack point-of-care blood management system to provide more accountable patient care, enhance safety, and improve efficiencies. Implementing the latest software version provides new emergency blood management functionality, updated user authentication tools and access to next generation technology platforms.

### An upgrade to BloodTrack v4.10 includes:

- Interactive, web-based inventory dashboard
- One kiosk - multiple storage device control
- New label verify options
- Microsoft® Active Directory® and LDAP Support
- Full BloodTrack Tx® functionality on iOS®

View inventory and system status via a web-browser.

Monitor inventory, alerts, events, and status; quickly spot areas needing attention.

## BloodTrack® Software Version Highlights:

Enhancements are cumulative, so when you upgrade, all of the features and enhancements in prior releases are included.

Leverage the MTP pack functionality to help meet ACS TQIP Massive Transfusion Guidelines for RBC to plasma ratio and product availability.<sup>3</sup>

## Haemonetics is making upgrading easy!

For more information about upgrading your BloodTrack system, call Customer Service at 877.996.7877, email [HSScustomerservice@haemonetics.com](mailto:HSScustomerservice@haemonetics.com), or contact your Haemonetics Account Director.

1. HaemoBank device functionality only.

2. Each storage location must contain a different product type.

3. American College of Surgeons (ACS) Trauma Quality Improvement Program (TQIP) Massive Transfusion in Trauma Guidelines recommends: 'Universally compatible RBC (O Rh-negative and O Rh-positive) and thawed plasma should be immediately available and ideally stored in the emergency department (ED).'
